The following Collaborative Activities were conducted under the MOU between DAV P.G. College, Varanasi and The Indian Institute of Cerebral Palsy and Handicapped Children, Varanasi in the Academic session **2018-19**

1. Training for What is screening test for autism?

Diagnosing autism spectrum disorder (ASD) can be difficult because there is no medical test, like a blood test, to diagnose the disorder. **Doctors look at the child's developmental history and behavior to make a diagnosis.** ASD can sometimes be detected at 18 months of age or younger.

2. How to detect Autism at 18 months of age?

3. Training about Developmental Monitoring
